## PREFACE

---

Volume 1 of the Tenth Census of Newfoundland and Labrador sets forth the total population enumerated as of date August 1, 1935, down to the smallest geographical areas, but without cross classification or analysis of any kind except by sex and by settlements and districts. The data covers each of the main subjects on the census schedules, (sex, age, conjugal condition, religion, birthplace, nationality, literacy, school attendance, mentally deficient and orphans).

The remaining Volumes will contain the results of the Census of Agriculture and Fisheries, Families and Dwellings, and the Occupations, Earnings and Industries all of which were taken concurrently with the Census of Population.

Tables 1 to 27 provide a survey of the population and school attendance, etc., of a number of decades; Tables 28 to 40 provide a survey of the population, etc., in more detail.

In Appendix A is set forth the list of Newfoundland Censuses from 1613 to 1935. Our thanks are due the Dominion Bureau of Statistics, Ottawa, Census Branch, for the use of this list, which is the result of much research work on their part.

In Appendix B is set forth a list of the names of localities in Newfoundland and Labrador.

The materials for this Volume were prepared under the direction of Mr. W. Halfyard, Statistical Officer, assisted by Mr. H. Coombs, Mr. J. Barron, Mr. J. V. Rabbitts, Mr. L. Larkin and Mr. C. Furey.

**Table 2. Per cent Increase of Population per Annum**

Period	Percent Increase per annum	Percent Increase Census Periods
1836-1857 . . . . .	3.11	65.50
1857-1869 . . . . .	1.49	17.90
1869-1874 . . . . .	2.02	10.10
1874-1884 . . . . .	2.23	22.30
1884-1891 . . . . .	0.34	2.38

1911-1921 . . . . .	0.84	8.41
1921-1935 . . . . .	0.71	10.10

The numerical increase of the population over that of 1921 is 26,555 or 10%.

Vital Statistics records show a total of 94,009 births and 51,865 deaths in Newfoundland and Labrador for the period from 1922 to 31st July, 1935, inclusive. The excess of 42,144 would be the natural growth of the population which by these figures should now total 305,177, being an increase of 16 per cent. for the fourteen years. From the records of Emigration and Immigration during the same period of years it is found that the loss to the population of the Colony is 8,796 or 3.4 per cent. of the 1921 population. This is 0.3 per cent. less than that of the ten years 1911-1921.

Subtracting this loss from the population with the natural increase added, we find that, according to the records of Vital Statistics and Migration, the present population should be 296,381.

By the Census Returns of 1935, it is found that the population is 289,588, thus showing a difference of 6,793 between the two methods of computation.

To recapitulate:		
Population 1921 . . . . .		263,033
Natural growth, say 16% . . . . .	42,144	
Less loss through emigration, say 3.4% . . . . .	8,796	
	<hr/>	
Balance added to Population, say 12.6% . . . . .		33,348
		<hr/>
		296,381
Less difference between Census Returns and returns of Vital Statistics and Emigration . . . . .		6,793
		<hr/>
Population as per Census Returns, 1935 . . . . .		289,588
		<hr/>

Adjustments have been made to show the population as at 1st August, 1935.

The natural growth for the period from 1922 to 31st July, 1935, inclusive, was 16 per cent. and for the ten years 1911-1921, 12.9 per cent; for 1901-1911, 13.5 per cent. The loss by emigration is 3.3 per cent; for 1911-1921, the loss was 3.7 per cent. which was an increase of 0.2 per cent. for the ten years between 1901-1911.

Minus (-) Sign denotes a decrease.

In Table 4 we have the population shown for the twenty-five districts, including Labrador, instead of 19 as in former Census Years. These Districts were set up under the Act, Chapter 7, 1932.

The largest numerical increase is to be found in the District of Humber, where there is an increase of 10,421 or 219.6 per cent. This is due to the establishment there of the town of Corner Brook with its paper-making industry.

Other Districts showing increases are: Grand Falls 55.8 per cent; White Bay 33.3; Labrador 24.9; St. John's West 19.2; St. Barbe 18.2; St. George's-Port au Port 10.5; Harbour Main-Bell Island 10.3; St. John's East 10.0; Fortune Bay and Hermitage 7.5; Burgeo and LaPoile 7.5; Fogo 4.0; Trinity South 3.7; Burin 3.6; Twillingate 2.4; Trinity North 0.5. The increase for Newfoundland is 9.7 per cent; Labrador 24.9.

Nine Districts show a decrease in population, namely: Carbonear-Bay de Verde 12.4; Port de Grave 12.4; Ferryland 9.3; Harbour Grace 7.7; Bonavista South 3.3; Bonavista North 2.3; Green Bay 1.7; Placentia West 1.0; Placentia and St. Mary's 0.8.

The natural growth of the various Districts is not shown here, because Vital Statistics records are made up of the nineteen Districts instead of twenty-five.

In the District of St. John's East the increase per cent is 7.4, but in the East portion of the City the increase per cent is 8.7, which shows a slightly greater increase than the Outports which form the part of that District.

Females per 1,000 males . . . . .	947	962	947

The gain to the Sexes in the Colony by natural increase has been as follows:—

**Period from 1922 to 31st July, 1935 inclusive:**

Male Births.. 48,255 Deaths . . . . 26,923 Gain to Males . . 21,332  
 Female Births 45,754 Deaths . . . . 24,942 Gain to Females 20,812

The loss to the sexes by emigration has been as follows:

Males who have left the country 102,158; less those who returned 96,333; loss to males 5,825.

Females who have left the country 61,866; less those who returned 58,895; loss to females 2,971.

That is by emigration and immigration there is a greater loss to the male sex than to the female sex by 2,854 persons.

This system of computation gives a larger number of both males and females in the Colony to-day than the figures shown by the actual returns of the census. The difference being 886 males and 5,907 females.

In Labrador, out of the population of 4,716, shown by the Census figures, there are 2,522 males and 2,194 females that is, there are only 870 females to every 1,000 males; in 1921 out of a population of 3,774 there were 2,025 males and 1,749 females, giving 864 females to every 1,000 males and in 1911 out of a population of 3,949 there were 2,054 males and 1,895 females giving 923 females to every 1,000 males.
